Safe India hackathon - #IndiaFightsCorona

About:

SafeIndiaHackathon is an online Idea Challenge & Hackathon being organized by Electropreneur Park Bhubaneswar, a Centre of Excellence in ESDM by STPI, to find solutions to issues in these difficult times of #CoronaPandemic (#COVID-19). The challenge is looking to identify and support solutions which shall enable us to face the difficulties of the lockdown, innovative preventive/corrective healthcare solutions and handling of unforeseen situations due to this pandemic.

Who can apply:

1. Working professionals
2. Educators & Researchers
3. Students & Innovators
4. Start-ups & Companies

Focus Areas:

1. Contactless detection or diagnostic product.
2. Developing devices and gadgets to support Social Distancing and Isolation.
3. Health monitoring solutions & devices
4. Solutions to stop spread of infection
5. Risk assessments and surveillance devices
6. Solutions for detecting violation of Social distancing norms and guidelines
7. User friendly Sanitation/Disinfection Tech-solutions at public places
8. Effective Quarantine monitoring and notification
9. Personal Protection Equipment and gadgets for healthcare professionals
10. Monitoring of animals or other assets adversely affected
11. Enhancing preparedness and efficiency in dealing with situation post lockdown
12. Other technology and hardware-based solutions for effective handling of pandemics

Selection Process: Idea Challenge followed by Hackathon

1. **Stage 1: Idea Challenge** – Innovative ideas and solutions which may be of super-duper need and will be required post this lockdown or to fight the pandemic's long-term impact.
2. **Stage 2: Hackathon** – Shortlisted innovative ideas to create a demonstratable POC within stipulated timelines.
